INTRODUCTION

The Annual Report on Dental Education and its accompanying supplements are intended to provide the Commission on Dental Accreditation, the community of dental educators and practitioners, state and federal agencies, and other interested groups with information on various aspects of dental education. The purpose of the present supplement, Dental Faculty Information, is to provide current and detailed information on the characteristics of the faculties of the sixty dental educational institutions located in the United States and Puerto Rico. The information contained in this supplement is a summary of data obtained from the Annual Survey of Predoctoral Dental Educational Institutions, American Dental Association, and from the Survey of Dental Educators, American Assocation of Dental Schools.

The information in this supplement has been presented in a set of fourteen tables. Each of these tables has been formatted in one of two ways. One format lists all sixty institutions either in alphabetical order by state or in rank order according to a particular characteristic. The other format lists institutions in either of these orders, however, they are first grouped according to their status as a public, private, or private-state-related institution.

In addition, the full time equivalents of faculty members have been reported in various tables according to academic discipline. These disciplines, however, have been grouped according to three broad areas, these are: basic science, preclinical and clinical, and auxiliary. Full time equivalents of those faculty whose primary responsibilities are administrative in nature are not included in the tabled values for these areas. Administrators have been excluded in an attempt to report undistorted student-faculty ratios for institutions, especially in the clinical sciences area.

Table 1 presents each institution's definition of full time faculty status. As this table shows, definitions of full time vary widely across institutions. For the purposes of this supplement, full time status is defined as a standard of ten half-days devoted to the institution. All full time equivalents reported are based on this standard and include all faculty, regardless of their status as full time or part time faculty.

Table 2 reports the full time equivalents for administrators, basic science and clinical science faculties. Since the

basic sciences are often taught by faculty other than the dental schools' faculties, the type of faculties presenting basic science instruction for the institution are indicated.

An analysis of the full time equivalents of faculty at each dental school would be incomplete without comparing the full time equivalents of the clinical sciences faculty members with student enrollment. The ratio of dental students to clinical faculty ranges from a low of 1.13 at Harvard University to a high of 9.30 at Creighton, with a mean ratio of 5.07 students to one clinical sciences faculty member (Table 3). Table 4 reports the same ratios rank-ordered and classified by type of institution.

Table 5 shows the ratios of total student enrollment (undergraduate and advanced specialities enrollments) to the total full time equivalents of the clinical sciences faculty. The mean ratio for all institutions is 5.56 students to one faculty member. The ratios range from 1.83 at Harvard University to 9.31 at Case Western Reserve University and Georgetown University. Table 6 shows the same ratios, classified by the type of institution and rank ordered.

Table 7 reports the full time equivalents for dental school faculty by department. The numbers of minority dental school faculty members are shown in Tables 8, 9, and 10. Tables 8 and 9 report the numbers of minority members by ethnic categories in the basic science and clinical science areas, respectively. Table 10 shows the number of women faculty members and administrators in dental institutions. The faculties of basic science, clinical science, behavioral science, and auxiliary are included.

The full time equivalents of support staff in the basic sciences and clinical sciences are shown in Tables 11 and 12, respectively. The full time equivalents for clinical support staff was selected for further analysis in Tables 13 and 14. Table 13 provides rank-ordered ratios of support staff to faculty for all institutions. As shown, these ratios range from a low of 0.16 support staff to one clinical faculty member at Loyola University to a high of 3.17 at the University of Mississippi, with a mean of 1.30. Table 14 shows the same information rank-ordered by type of institution.
